Description

This SOP outlines the steps to resolve the ALARM_6854, a Major alarm on the Arista Access Switch Bangalore KA 72.

Potential Root Causes

Cause	Probability
Hardware Failure	High
Software Bug	Medium
Misconfigured Settings	Low

Diagnostic Commands

```
show system internal error log
show interface status
show ip interface brief
show mac address-table
```

Resolution Steps

- Step 1: {'Step': 1, 'Action': 'Check the event logs for any related errors or warnings', 'CLI_Command': 'show system internal error log'}
- Step 2: {'Step': 2, 'Action': 'Verify the interface status and configuration', 'CLI_Command': 'show interface status'}
- Step 3: {'Step': 3, 'Action': 'Verify the IP configuration and MAC address table', 'CLI_Command': 'show ip interface brief | show mac address-table'}
- Step 4: {'Step': 4, 'Action': 'Reset the switch to factory defaults if necessary', 'CLI_Command': 'request system reload'}
- Step 5: {'Step': 5, 'Action': 'Verify the alarm has cleared', 'CLI_Command': 'show system internal alarm'}

Post-Check Verification

```
show system internal alarm
show interface status
```

```
show ip interface brief
show mac address-table
```
