

Troubleshooting SOP for ALARM_2273 on Arista Access Switch

Node: Arista-Access-Kolkata-WB-122 | **Vendor:** Arista | **Severity:** Warning | **Alarm Code:** ALARM_2273

Description

ALARM_2273 is a Warning alarm indicating a potential issue with the switch's forwarding table. This SOP outlines the steps to diagnose and resolve the issue.

Potential Root Causes

Cause	Probability
Insufficient memory on the switch	High
Misconfigured forwarding table	Medium
Hardware issue with the switch	Low

Diagnostic Commands

```
show system resources
show forwarding-table
show environment
show hardware
show tech-support
```

Resolution Steps

Step 1: {'Step': '1. Check system resources', 'Action': "Run the 'show system resources' command to check the available memory on the switch."}

Step 2: {'Step': '2. Verify forwarding table configuration', 'Action': "Run the 'show forwarding-table' command to verify the forwarding table configuration. Check for any misconfigurations or inconsistencies."}

Step 3: {'Step': '3. Check hardware status', 'Action': "Run the 'show hardware' command to check the status of the switch's hardware components. Check for any errors or warnings."}

Step 4: {'Step': '4. Clear forwarding table', 'Action': "Run the 'clear forwarding-table' command to clear the forwarding table and restart the switch."}

Step 5: {'Step': '5. Verify issue resolution', 'Action': "Run the 'show forwarding-table' command again to verify that the issue has been resolved."}

Post-Check Verification

```
show forwarding-table  
show system resources  
show environment  
show hardware
```
