

Arista Access Switch Alarm ALARM_4459

Troubleshooting Procedure

Node: Arista-Access-Mumbai-MH-56 | **Vendor:** Arista | **Severity:** Major | **Alarm Code:** ALARM_4459

Description

ALARM_4459 is a Major alarm indicating a hardware or software issue on the Arista Access Switch
Node ID: Arista-Access-Mumbai-MH-56

Potential Root Causes

Cause	Probability
Hardware Failure	High
Software Bug	Medium
Configuration Error	Low

Diagnostic Commands

```
show hardware health
show system resources
show version
show log
```

Resolution Steps

- Step 1: {'Step': 'Run diagnostic tests to identify the root cause', 'Action': 'Run the diagnostic commands listed above to gather more information about the issue'}
- Step 2: {'Step': 'Replace faulty hardware', 'Action': 'Replace the faulty hardware component and verify the switch boots up successfully'}
- Step 3: {'Step': 'Update software or firmware', 'Action': 'Update the software or firmware to the latest version and verify the issue is resolved'}
- Step 4: {'Step': 'Review configuration files', 'Action': 'Review the configuration files to ensure there are no errors or inconsistencies'}

Post-Check Verification

```
show hardware health
show system resources
show version
```

```
ping test to verify connectivity
```
