

Arista PE Router Alarm SOP for ALARM_1230

Node: Arista-PE-Bangalore-KA-76 | **Vendor:** Arista | **Severity:** Major | **Alarm Code:** ALARM_1230

Description

This SOP outlines the procedures for diagnosing and resolving a Major Alarm on Arista-PE-Bangalore-KA-76, a Provider Edge Router from Arista, with Alarm Code ALARM_1230.

Potential Root Causes

Cause	Probability
High CPU Utilization	High
Memory Leak	Medium
Software Bug	Low

Diagnostic Commands

```
show system resources
show system processes
show system memory
debug hardware
```

Resolution Steps

- Step 1: {'Step': 'Check CPU Utilization', 'Action': "Run 'show system resources' command to check CPU utilization. If CPU utilization is high, consider adding more resources or optimizing the system.", 'CLI_Command': 'show system resources'}
- Step 2: {'Step': 'Check Memory Leak', 'Action': "Run 'show system memory' command to check for memory leak. If memory leak is detected, restart the system or contact Arista support.", 'CLI_Command': 'show system memory'}
- Step 3: {'Step': 'Restart the System', 'Action': "Restart the system to clear any software bugs or issues. Run 'reload' command to restart the system.", 'CLI_Command': 'reload'}

Post-Check Verification

```
show system resources
show system processes
show system memory
```
