

Arista PE Bangalore (KA-76) Alarm: ALARM_4199 (Warning)

Node: Arista-PE-Bangalore-KA-76 | **Vendor:** Arista | **Severity:** Warning | **Alarm Code:** ALARM_4199

Description

This SOP outlines the procedure for troubleshooting and resolving the ALARM_4199 (Warning) on the Arista PE Bangalore (KA-76) node.

Potential Root Causes

Cause	Probability
Inconsistent BGP neighbor configuration	Medium
Incomplete or misconfigured routing policy	High
Physical or logical issue with a network interface	Low

Diagnostic Commands

```
show ip bgp summary
show ip bgp neighbors
show routing-policy
show interface detail
show log | grep ALARM_4199
```

Resolution Steps

Step 1: {'Step': 1, 'Description': "Verify BGP neighbor configuration using the 'show ip bgp neighbors' command.", 'Commands': ['show ip bgp neighbors'], 'Expected_Output': 'Check for inconsistent neighbor configurations.'}

Step 2: {'Step': 2, 'Description': "Check routing policy configuration using the 'show routing-policy' command.", 'Commands': ['show routing-policy'], 'Expected_Output': 'Verify if the policy is complete and correctly configured.'}

Step 3: {'Step': 3, 'Description': "Inspect the physical and logical status of network interfaces using the 'show interface detail' command.", 'Commands': ['show interface detail'], 'Expected_Output': 'Check for any issues with the interface.'}

Step 4: {'Step': 4, 'Description': "Check system logs using the 'show log | grep ALARM_4199' command.", 'Commands': ['show log | grep ALARM_4199'], 'Expected_Output': 'Check for any relevant logs related to the alarm.'}

Step 5: {'Step': 5, 'Description': 'Correct any inconsistencies or misconfigurations.', 'Commands': ['config t', 'neighbor remote-as ', 'no routing-policy ', 'interface ', 'shutdown', 'no shutdown'], 'Expected_Output': 'Verify the alarm is cleared after correcting the issue.'}

Post-Check Verification

```
show ip bgp summary
show ip bgp neighbors
show routing-policy
show interface detail
show log | grep ALARM_4199
```
