

Cisco Access Switch Bangalore KA-70 Alarm Resolution SOP - ALARM_6241

Node: Cisco-Access-Bangalore-KA-70 | **Vendor:** Cisco | **Severity:** Major | **Alarm Code:** ALARM_6241

Description

This SOP outlines the steps to resolve a Major alarm ALARM_6241 on Cisco Access Switch Bangalore KA-70, which is a critical issue that may impact network uptime and service.

Potential Root Causes

Cause	Probability
Incorrect configuration of VLANs or ports	High
Hardware failure in access switch	Medium
Software bug or incompatibility issue	Low

Diagnostic Commands

```
show vlan | include error
show interface status | include down
debug switch vlan
show tech-support
```

Resolution Steps

- Step 1: {'Step': 'Verify VLAN and port configuration', 'Action': "Check VLAN and port settings using 'show vlan' and 'show interface status' commands. Verify that VLANs and ports are correctly configured.", 'CLI_Command': 'show vlan | include error'}
- Step 2: {'Step': 'Check for hardware failure', 'Action': "Run 'show tech-support' command to check for any hardware failure or incompatibility issues.", 'CLI_Command': 'show tech-support'}
- Step 3: {'Step': 'Update software or firmware', 'Action': "Check for any software or firmware updates for the access switch using 'show version' command. Update the software or firmware if necessary.", 'CLI_Command': 'show version'}
- Step 4: {'Step': 'Reset or replace access switch', 'Action': 'Reset or replace the access switch if hardware failure is confirmed.', 'CLI_Command': ''}

Post-Check Verification

```
show vlan | include error
show interface status | include down
```

show tech-support
