

SOC Standard Operating Procedure for Major Alarm ALARM_8196 on Cisco Access Switch Chennai

Node: Cisco-Access-Chennai-TN-100 | **Vendor:** Cisco | **Severity:** Major | **Alarm Code:** ALARM_8196

Description

This SOP outlines the steps to be taken in case of a major alarm ALARM_8196 on Cisco Access Switch Chennai, which is a critical alarm indicating a potential network failure.

Potential Root Causes

Cause	Probability
Power Supply Failure	High
Over-Temperature	Medium
Hardware Failure	Low

Diagnostic Commands

```
show power inline
show envmon
show system resources
show tech-support
```

Resolution Steps

- Step 1: {'Step': '1. Power off the switch and check the power supply units (PSUs) for any signs of physical damage.', 'Action': 'Check the PSUs for any signs of physical damage.'}
- Step 2: {'Step': '2. Check the temperature of the switch using the show envmon command.', 'Action': 'Show envmon'}
- Step 3: {'Step': '3. Run the show system resources command to check for any hardware failures.', 'Action': 'Show system resources'}
- Step 4: {'Step': '4. If the issue persists, run the show tech-support command to generate a technical support file and send it to the manufacturer for further analysis.', 'Action': 'Show tech-support'}
- Step 5: {'Step': '5. Replace the faulty PSU or hardware component, and power on the switch.', 'Action': 'Replace PSU/Hardware and power on'}

Post-Check Verification

```
show power inline
```

```
show envmon  
show system resources
```
