

SOP - ALARM_6313: Major - Cisco Access Switch Kolkata WB 112 Alarm

Node: Cisco-Access-Kolkata-WB-112 | **Vendor:** Cisco | **Severity:** Major | **Alarm Code:** ALARM_6313

Description

ALARM_6313 indicates a major issue on Cisco Access Switch Kolkata WB 112. This alarm triggers due to the loss of connection to a critical network device.

Potential Root Causes

Cause	Probability
Invalid configuration on the switch causing connectivity loss	High
Hardware failure in the switch or its components	Medium
Software issues or bugs in the switch's firmware	Low

Diagnostic Commands

```
show version
show running-config
show interfaces
show ip interface brief
show ip route
```

Resolution Steps

- Step 1: {'Step': '1. Identify the impacted interface', 'Description': "Use 'show interfaces' command to identify the impacted interface.", 'Command': 'show interfaces'}
- Step 2: {'Step': '2. Verify the interface configuration', 'Description': "Use 'show running-config' command to verify the interface configuration.", 'Command': 'show running-config'}
- Step 3: {'Step': '3. Check for any hardware issues', 'Description': "Use 'show interfaces' command to check for any hardware issues.", 'Command': 'show interfaces'}
- Step 4: {'Step': '4. Reset the switch', 'Description': "Issue the command 'reload' to reset the switch.", 'Command': 'reload'}
- Step 5: {'Step': '5. Verify connectivity', 'Description': "Use 'show ip interface brief' command to verify the connectivity.", 'Command': 'show ip interface brief'}

Post-Check Verification

```
show ip interface brief
show ip route
ping
```
