

SOP for Resolving Major Alarm ALARM_4894 on Node ID Cisco-PE-Chennai-TN-88

Node: Cisco-PE-Chennai-TN-88 | **Vendor:** Cisco | **Severity:** Major | **Alarm Code:** ALARM_4894

Description

Major Alarm ALARM_4894 on Node ID Cisco-PE-Chennai-TN-88 indicates a critical issue affecting the Provider Edge Router, impacting network connectivity and reliability.

Potential Root Causes

Cause	Probability
Hardware Failure	High
Software Misconfiguration	Medium
Misaligned BGP Peering	Low

Diagnostic Commands

```
show ip bgp summary
show ip bgp neighbors
show run | inc bgp
show tech-support | include ALARM_4894
```

Resolution Steps

- Step 1: {'Step': "1. Run the 'show ip bgp summary' command to verify BGP connection status.", 'Action': 'Verify BGP connection status and ensure it is established.'}
- Step 2: {'Step': "2. Run the 'show ip bgp neighbors' command to verify BGP neighbor status.", 'Action': 'Verify BGP neighbor status and ensure it is established.'}
- Step 3: {'Step': "3. Run the 'show run | inc bgp' command to verify BGP configuration.", 'Action': 'Verify BGP configuration and correct any misconfigurations.'}
- Step 4: {'Step': "4. Run the 'show tech-support | include ALARM_4894' command to gather system logs.", 'Action': 'Gather system logs and review for any hardware or software issues.'}
- Step 5: {'Step': "5. If hardware failure is suspected, execute a 'show version' command to verify router software version.", 'Action': 'Verify router software version and update if necessary.'}
- Step 6: {'Step': "6. If software misconfiguration is suspected, execute a 'copy run start' command to save running configuration.", 'Action': 'Save running configuration and restart the router.'}

Post-Check Verification

```
show ip bgp summary  
show ip bgp neighbors  
show run | inc bgp  
show tech-support | include ALARM_4894
```
