

Cisco Provider Edge Router SOP for Alarm Code ALARM_5707

Node: Cisco-PE-Delhi-NCR-33 | **Vendor:** Cisco | **Severity:** Major | **Alarm Code:** ALARM_5707

Description

This SOP outlines the steps to troubleshoot and resolve the Alarm Code ALARM_5707 on the Cisco Provider Edge Router located at Delhi NCR site, Node ID: Cisco-PE-Delhi-NCR-33.

Potential Root Causes

Cause	Probability
Misconfigured BGP sessions	High
BGP neighbor down	Medium
Router CPU utilization is high	Low

Diagnostic Commands

```
show ip bgp summary
show bgp neighbors
show process cpu
show ip bgp neighbors received-routes
show ip bgp neighbors sent-routes
```

Resolution Steps

- Step 1: {'Step': 'Check BGP session status', 'Action': 'show ip bgp summary | include ', 'Output': 'Verify the BGP session is established.'}
- Step 2: {'Step': 'Verify BGP neighbor configuration', 'Action': 'show run | include bgp neighbor ', 'Output': 'Verify the BGP neighbor configuration is correct.'}
- Step 3: {'Step': 'Check router CPU utilization', 'Action': 'show process cpu | include cpu', 'Output': 'Verify the router CPU utilization is within normal limits.'}
- Step 4: {'Step': 'Clear BGP session', 'Action': 'clear ip bgp ', 'Output': 'Clear the BGP session to re-establish it.'}
- Step 5: {'Step': 'Verify BGP session after clear', 'Action': 'show ip bgp summary | include ', 'Output': 'Verify the BGP session is established after clearing it.'}

Post-Check Verification

```
show ip bgp summary | include  
show bgp neighbors received-routes  
show bgp neighbors sent-routes
```
