

SOP: Resolving Minor Alarm ALARM_3920 on Cisco-PE-Kolkata-WB-112

Node: Cisco-PE-Kolkata-WB-112 | **Vendor:** Cisco | **Severity:** Minor | **Alarm Code:** ALARM_3920

Description

This Standard Operating Procedure outlines the steps to diagnose, resolve, and verify the fix for Minor Alarm ALARM_3920 on Cisco-PE-Kolkata-WB-112, a Cisco Provider Edge Router.

Potential Root Causes

Cause	Probability
Interface Link Down	Medium
Routing Protocol Adjacency Issues	Low
Neighbor Router Issues	Low

Diagnostic Commands

```
show ip int brief
show ip bgp summary
show ip bgp neighbors
show logging | include ALARM_3920
```

Resolution Steps

Step 1: {'Step': 'Check interface status', 'Description': "Verify the status of the interface using the 'show ip int brief' command and check for any errors.", 'Action': "If the interface is down, bring it up using the 'no shut' command."}

Step 2: {'Step': 'Verify routing protocol adjacency', 'Description': "Check the routing protocol adjacency status using the 'show ip bgp summary' command.", 'Action': "If the adjacency is not established, verify the neighbor router's configuration and make necessary changes."}

Step 3: {'Step': 'Verify neighbor router status', 'Description': "Check the neighbor router's status using the 'show ip bgp neighbors ' command.", 'Action': 'If the neighbor router is not reachable, verify its status and make necessary changes.'}

Post-Check Verification

```
show ip int brief
show ip bgp summary
show ip bgp neighbors
```

```
show logging | include ALARM_3920
```
