

Standard Operating Procedure for Ericsson PE Bangalore KA-59 Alarm ALARM_3013

Node: Ericsson-PE-Bangalore-KA-59 | **Vendor:** Ericsson | **Severity:** Major | **Alarm Code:** ALARM_3013

Description

This SOP outlines the steps to diagnose, resolve and verify a Major alarm ALARM_3013 on Ericsson Provider Edge Router (PE) Bangalore KA-59.

Potential Root Causes

Cause	Probability
Incorrect configuration of BGP peer	High
Interface down or flapping	Medium
Software issue or bug	Low

Diagnostic Commands

```
show bgp summary
show ip interface brief
show processes memory
show logging messages | include ALARM_3013
debug bgp detail
```

Resolution Steps

- Step 1: {'Step': 'Verify BGP peer configuration', 'Action': "Check BGP peer group and peer configuration using 'show bgp peer-group' and 'show bgp peer' commands", 'CLI_Command': 'show bgp peer-group'}
- Step 2: {'Step': 'Check interface status', 'Action': "Verify interface status using 'show ip interface brief' command and check for any interface down or flapping issues", 'CLI_Command': 'show ip interface brief'}
- Step 3: {'Step': 'Reset BGP peer', 'Action': "Reset BGP peer using 'clear bgp peer-group ' command", 'CLI_Command': 'clear bgp peer-group '}
- Step 4: {'Step': 'Check for software issue', 'Action': "Check for any software issues or bugs using 'show processes memory' and 'show logging messages | include ALARM_3013' commands", 'CLI_Command': 'show processes memory'}
- Step 5: {'Step': 'Reboot the router', 'Action': 'Reboot the router to resolve any software issues', 'CLI_Command': 'reboot'}

Post-Check Verification

```
show bgp summary
show ip interface brief
show processes memory
show logging messages | include ALARM_3013
```
