

Huawei Access Switch - Alarm Code ALARM_8593

Major Alarm Handling SOP

Node: Huawei-Access-Bangalore-KA-76 | **Vendor:** Huawei | **Severity:** Major | **Alarm Code:** ALARM_8593

Description

Alarm Code ALARM_8593 indicates a major issue on Huawei Access Switch Node ID: Huawei-Access-Bangalore-KA-76. This SOP outlines the steps to diagnose and resolve the issue.

Potential Root Causes

Cause	Probability
CPU Usage exceeding Threshold	High
High memory consumption by certain processes	Medium
Interface or Link issues	Low

Diagnostic Commands

```
display cpu-usage
display memory-usage
display interface brief
display link-status
```

Resolution Steps

Step 1: {'Step': '1. Check CPU usage and memory consumption', 'Action': 'Run display cpu-usage and display memory-usage commands to identify the root cause.', 'CLI_Command': 'display cpu-usage; display memory-usage'}

Step 2: {'Step': '2. Optimize system resources', 'Action': 'Adjust system settings to optimize CPU and memory usage.', 'CLI_Command': 'cpu-usage threshold ; memory-usage threshold '}

Step 3: {'Step': '3. Identify and resolve interface or link issues', 'Action': 'Run display interface brief and display link-status commands to identify any issues.', 'CLI_Command': 'display interface brief; display link-status'}

Step 4: {'Step': '4. Restart the switch', 'Action': 'Run the restart command to restart the switch and apply the changes.', 'CLI_Command': 'restart'}

Post-Check Verification

```
display cpu-usage
```

```
display memory-usage  
display interface brief  
display link-status
```
