

Huawei Access Switch Node ID: Huawei-Access-Delhi-NCR-12 SOP for Alarm Code ALARM_7099

Node: Huawei-Access-Delhi-NCR-12 | **Vendor:** Huawei | **Severity:** Major | **Alarm Code:** ALARM_7099

Description

Alarm Code ALARM_7099 indicates a Major issue on Huawei Access Switch Node ID: Huawei-Access-Delhi-NCR-12

Potential Root Causes

Cause	Probability
Hardware failure or malfunctioning	High
Software issues or bugs	Medium
Network congestion or overload	Low

Diagnostic Commands

```
display version
display system info
display hardware internal info
display process cpu info
```

Resolution Steps

- Step 1: {'Step': 'Check the hardware for any signs of physical damage or malfunctioning', 'Action': 'Use the display system info command to check the system temperature and fan status'}
- Step 2: {'Step': 'Verify the software version and check for any recent updates', 'Action': 'Use the display version command to check the software version and then use the install package command to upgrade to the latest version'}
- Step 3: {'Step': 'Check the network congestion or overload', 'Action': 'Use the display process cpu info command to check the CPU usage and the display queue info command to check the queue length'}
- Step 4: {'Step': 'Replace the faulty hardware or software if necessary', 'Action': 'Use the replace component command to replace the faulty hardware or software'}

Post-Check Verification

```
display version  
display system info  
display hardware internal info  
display process cpu info
```
