

Huawei Access Switch Alarm Resolution SOP: ALARM_4986

Node: Huawei-Access-Kolkata-WB-116 | **Vendor:** Huawei | **Severity:** Critical | **Alarm Code:** ALARM_4986

Description

This SOP outlines the steps to diagnose and resolve the critical alarm ALARM_4986 on the Huawei Access Switch Node ID: Huawei-Access-Kolkata-WB-116.

Potential Root Causes

Cause	Probability
High CPU utilization due to software bugs or misconfiguration	High
Physical or environmental issues such as overheating or power supply problem	Medium
Misconfigured or outdated software/firmware version	Low

Diagnostic Commands

```
display cpu usage
display sys alarm
display environment temperature
display power supply information
```

Resolution Steps

- Step 1: {'Step': 'Restart the switch to clear potential software issues', 'Action': 'hw sys restart', 'Note': 'Wait for the switch to come back online and verify if the alarm is cleared'}
- Step 2: {'Step': 'Verify and update the software/firmware version to the latest available', 'Action': 'display version', 'Note': 'Check for any available updates and apply them if necessary'}
- Step 3: {'Step': 'Check and rectify any physical or environmental issues', 'Action': 'Verify environment temperature and power supply information', 'Note': 'Take corrective action to resolve any physical or environmental issues identified'}
- Step 4: {'Step': 'Review and adjust the switch configuration to prevent similar issues in the future', 'Action': 'display current configuration', 'Note': 'Identify and rectify any configuration issues that may have contributed to the alarm'}

Post-Check Verification

```
display cpu usage
```

```
display sys alarm  
display environment temperature  
display power supply information
```
