

Huawei Access Switch ALARM_7352 Critical Alarm Resolution SOP

Node: Huawei-Access-Kolkata-WB-120 | **Vendor:** Huawei | **Severity:** Critical | **Alarm Code:** ALARM_7352

Description

This SOP outlines the steps to diagnose and resolve the Huawei Access Switch critical alarm ALARM_7352.

Potential Root Causes

Cause	Probability
Hardware Failure	High
Software Bug	Medium
Configuration Error	Low

Diagnostic Commands

```
display version
display hardware
display running-configuration | include ALARM_7352
debug enable
debug alarm 7352
```

Resolution Steps

- Step 1: {'Step': '1. Power Cycle the device', 'Description': 'Power cycle the Huawei Access Switch to ensure that the issue is not due to a temporary glitch.', 'CLI_Command': 'System Power Cyclic'}
- Step 2: {'Step': '2. Check hardware', 'Description': 'Check the hardware for any signs of damage or failure.', 'CLI_Command': 'display hardware'}
- Step 3: {'Step': '3. Check software', 'Description': 'Check the software for any bugs or issues that may be causing the alarm.', 'CLI_Command': 'display version'}
- Step 4: {'Step': '4. Check configuration', 'Description': 'Check the configuration for any errors or inconsistencies that may be causing the alarm.', 'CLI_Command': 'display running-configuration | include ALARM_7352'}
- Step 5: {'Step': '5. Run debug commands', 'Description': 'Run debug commands to collect more information about the alarm.', 'CLI_Command': 'debug enable'}

Step 6: {'Step': '6. Clear the alarm', 'Description': 'Clear the alarm if it is a false positive.', 'CLI_Command': 'undo alarm 7352'}

Post-Check Verification

```
display version
display hardware
display running-configuration | include ALARM 7352
debug alarm 7352
```
