

Juniper Provider Edge Router (PE) - Alarm Handling SOP: ALARM_6798

Node: Juniper-PE-Kolkata-WB-117 | **Vendor:** Juniper | **Severity:** Critical | **Alarm Code:** ALARM_6798

Description

This SOP outlines the procedures to identify, diagnose, and resolve the ALARM_6798 on Juniper-PE-Kolkata-WB-117, a critical alarm indicating a severe network issue.

Potential Root Causes

Cause	Probability
High CPU utilization on Juniper-PE-Kolkata-WB-117	High
Memory leak due to software or configuration issues	Medium
Hardware malfunction or failure	Low

Diagnostic Commands

```
show system resources | match cpu | match memory
show system processes | match high-cpu
show system statistics | match memory-usage
```

Resolution Steps

- Step 1: {'Step': 1, 'Action': 'Check system resources and processes to identify the cause of high CPU utilization', 'Command': 'show system resources | match cpu'}
- Step 2: {'Step': 2, 'Action': 'Kill or restart high CPU processes', 'Command': 'kill | restart system'}
- Step 3: {'Step': 3, 'Action': 'Verify memory usage and check for memory leaks', 'Command': 'show system statistics | match memory-usage'}
- Step 4: {'Step': 4, 'Action': 'Reboot the router if necessary', 'Command': 'request system reboot'}
- Step 5: {'Step': 5, 'Action': 'Verify the issue is resolved and the alarm clears', 'Command': 'show alarm-clear-all'}

Post-Check Verification

```
show system resources | match cpu | match memory
show system statistics | match memory-usage
show alarm-clear-all
```
