

SOP: Troubleshooting Critical Alarm ALARM_1546 on Nokia Core Router at Node ID: Nokia-Core-Delhi-NCR-2

Node: Nokia-Core-Delhi-NCR-2 | **Vendor:** Nokia | **Severity:** Critical | **Alarm Code:** ALARM_1546

Description

Critical Alarm ALARM_1546 on Nokia Core Router at Node ID: Nokia-Core-Delhi-NCR-2 indicates a severe issue that requires immediate attention. This SOP outlines the steps to diagnose, resolve and verify the fix.

Potential Root Causes

Cause	Probability
High CPU utilization on the Core Router	High
Memory Leak in the Router's Software	Medium
Misconfigured BGP Peering	Low

Diagnostic Commands

```
show cpu usage
show memory usage
show bgp summary
show bgp neighbors
show logging messages
```

Resolution Steps

- Step 1: {'Step': '1. Check CPU and Memory Utilization', 'Action': "Run 'show cpu usage' and 'show memory usage' commands to identify any anomalies."}
- Step 2: {'Step': '2. Clear Memory Leaks (if identified)', 'Action': "Run 'clear memory leaks' command to clear any identified memory leaks."}
- Step 3: {'Step': '3. Reconfigure BGP Peering (if misconfigured)', 'Action': "Run 'configure terminal', then 'router bgp', followed by 'neighbor remote-as ' to reconfigure BGP peering."}
- Step 4: {'Step': '4. Restart the Router (if necessary)', 'Action': "Run 'reload' command to restart the router."}

Post-Check Verification

```
show cpu usage  
show memory usage  
show bqp summary  
show bqp neighbors  
show logging messages
```
