

Nokia Core Router Alarm Resolution SOP for ALARM_5756

Node: Nokia-Core-Kolkata-WB-2 | **Vendor:** Nokia | **Severity:** Major | **Alarm Code:** ALARM_5756

Description

This SOP outlines the steps to diagnose and resolve the Nokia Core Router ALARM_5756, a Major alarm indicating a critical issue.

Potential Root Causes

Cause	Probability
Hardware Failure in the Nokia Core Router	High
Software Bug or Misconfiguration	Medium
Network Congestion or Denial of Service (DoS) Attack	Low

Diagnostic Commands

```
show alarm detail ALARM_5756
show system status
show interface statistics
show ip traffic
```

Resolution Steps

Step 1: {'Step': 'Identify the root cause of the alarm', 'Description': 'Use the diagnostic commands to determine the cause of the alarm', 'Actions': ['Run show alarm detail ALARM_5756 to gather more information about the alarm', 'Check system logs and interface statistics for any anomalies', 'Verify network connectivity and traffic patterns']}

Step 2: {'Step': 'Perform hardware maintenance (if applicable)', 'Description': 'Replace or repair faulty hardware components', 'Actions': ['Power down the router and replace or repair the faulty hardware', 'Verify hardware replacement or repair']}

Step 3: {'Step': 'Configure or update software (if applicable)', 'Description': 'Apply software patches or updates to resolve the issue', 'Actions': ['Backup existing configuration', 'Apply software patches or updates', 'Verify software update']}

Step 4: {'Step': 'Verify network congestion or DoS attack (if applicable)', 'Description': 'Monitor network traffic and adjust configurations as necessary', 'Actions': ['Monitor network traffic and interface statistics', 'Adjust configuration to alleviate network congestion or DoS attack']}

Post-Check Verification

```
show alarm detail ALARM_5756
show system status
show interface statistics
show ip traffic
```
